

TECHNICAL RIDER VON TONCHIRURGIE

Sound:

Channel 1: male voice (SM 58 or another), out: XLR

Channel 2: female voice (SM 58 or another), out: XLR

Channel 3 and 4: Stereo-output instruments (synthesizer, laptop, drum machines, already mixed), Out: two jack cables, DI-Box is necessary

Show:

- A high quality big video screen overhead, which is able to be controlled from the stage. Alternative there are two rollups at both sides from the stage next to the singers.
- Place for the dancer(s) without cable in the back of the singers
- Fog
- Light, moving and changing
- Laser lights (That would be great)
- Stroboscope (That would be great)
